About me

Founder of The Axora, a software solutions agency focused on full-stack web development, embeddable AI widgets, and AI call agents. Passionate about building innovative digital solutions that help businesses improve their customer experience and grow.

Experience

Software Developer

Jul 2026- Sep 2026

R.A.K Services

- Working on a Laravel-based web application using PHP and MySQL.
- Developing new features, fixing bugs, and maintaining existing functionality.
- Working with databases, APIs, and backend development.

Personal Projects

The Axora – AI & Software Solutions

Built a software solutions company offering full-stack web development, embeddable AI chat widgets, and AI call agents.

Developed an AI chatbot widget designed to help businesses answer customer questions and handle appointment requests 24/7.

AI Hotel Management System – DineX

Developed an AI-powered hotel management platform with digital menus, table reservations, Room Booking, NGO integration, AI chat assistant, and AI voice assistant.

RAG Intelligent Document Assistant

Built an AI-powered document assistant that allows users to upload documents and ask questions using retrieval-augmented generation (RAG).
